**Unit of Competency**

Functional Area - Vehicle Servicing

Title	Dismantle and repair electric and hybrid vehicle WiFi, General Pocket Radio Service (GPRS) and various sensors for vehicle control
Code	108694L2
Range	This unit of competency is applicable in electric and hybrid vehicle servicing workshops. Practitioners should be able to dismantle and repairing electric and hybrid vehicle WiFi, GPRS and various sensors for vehicle control safely according to the instructions in the electric and hybrid vehicle manufacturer's service manual and the relevant requirements on environment, occupational safety and health regulations. They should also be able to conduct basic tests on components upon completion of work and providing written report.
Level	2
Credit	6 (For Reference Only)
Competency	<p>Performance Requirements</p> <p>1. Knowledge (Electric and hybrid vehicle WiFi, GPRS and various sensors for vehicle control)</p> <ul style="list-style-type: none"> <li>• Understand the structure and operation of the electric and hybrid vehicle WIFI, GPRS and various sensors for vehicle control.</li> <li>• Understand the dismantle and repair procedure according to the instructions in the electric and hybrid vehicle manufacturer's service manual</li> <li>• Know the tools and equipment to dismantle and repair of the WIFI, GPRS and various sensors for vehicle control</li> <li>• Understanding of the relevant legal requirements on road &amp; vehicle safety, and environment protection.</li> </ul> <p>2. Performance (Dismantle and repair electric and hybrid vehicle WIFI, GPRS and various sensors for vehicle control)</p> <ul style="list-style-type: none"> <li>• According to the instructions in the electrical and hybrid vehicle manufacturer's servicing manual and the requirements of occupational safety and health as well as that of environmental protection, dismantle and repair the WIFI, GPRS and various sensors for vehicle control of an electric and hybrid vehicle safety, including: <ul style="list-style-type: none"> <li>○ Capable of identifying the common faults in the components by visual inspection</li> <li>○ Testing and assess the operation and effectiveness of the component.</li> <li>○ Rectify typical system faults.</li> </ul> </li> <li>• Conduct performance and safety inspection after the work and provide written report focusing on: <ul style="list-style-type: none"> <li>○ Abnormalities</li> <li>○ Measured data</li> <li>○ Major decisions.</li> </ul> </li> </ul>
Assessment Criteria	<p>The integrated outcome requirements of this unit of competency are that the practitioner being assessed shall prove that he/she is:</p> <ul style="list-style-type: none"> <li>• Capable of dismantling and repairing electric and hybrid vehicle WiFi, GPRS and various sensors for vehicle control safely according to the instructions in the electric and hybrid vehicle manufacturer's servicing manual and the relevant requirements on environment, occupational safety and health regulations; and</li> <li>• Capable of conducting basic tests on components upon completion of work and providing working report.</li> </ul>
