| 1. Title                  | Replace mechanical parts and devices of electric motors  |
|---------------------------|--|
| 2. Code                   | EMCUIN221A   |
| 3. Range                  | Capable to replace mechanical parts and devices of electric motors in electrical and mechanical workshops or worksites.  |
| 4. Level                  | 2  |
| 5. Credit                 | 3  |
| 6. Competency             | Performance Requirements   |
|                           | <ul> <li>6.1 Operating principles of motor machinery and method of replacing the mechanical parts and devices machinery</li> </ul>   |
|                           | <ul> <li>6.2 Mechanical parts<br/>and devices of<br/>electric motors</li> <li>Operate mechanical parts and devices of an electric motor, such as<br/>the driving units like bearing, connector, gear, etc., and replace<br/>mechanical parts and devices of the motor</li> </ul>     |
| 7. Assessment<br>Criteria | <ul> <li>The integrated outcome requirements of this unit of competency are:</li> <li>(i) Capable to understand the principles and methods of operating motor machinery; and</li> <li>(ii) Capable to replace mechanical parts and devices safely of the specified motor.</li> </ul> |
| 8. Remarks                | The credit value of this unit of competency is set on the presumption that the person already possesses basic electrical and mechanical knowledge.   |
