1.	Title	Obtain data and information of occupational safety and health and environmental protection to compile relevant statistics
2.	Code	EMCUSH211A
3.	Range	Obtain data and information of occupational safety and health and environmental protection, and use percentage and graphic data to make simple analysis and statistics.
4.	Level	2
5.	Credit	3
6.	Competency	Performance Requirements
		<ul> <li>Data and information of occupational safety and health and environmental protection</li> <li>Analyze information and data of occupational safety and health and environmental protection; use percentage and graphs to make simple calculations and statistics based on the data obtained, and come up with simple conclusions</li> <li>Compile relevant statistics according</li> <li>Understand how to use percentage and graphic data to make simple calculations and environmental protection</li> <li>Analyze information and data of occupational safety and health and environmental protection; use percentage and graphs to make simple calculations and statistics based on the data and information of occupational safety and health and</li> </ul>
		to data and environmental protection  Obtain data and information of occupational safety and health and environmental protection to compile relevant statistics, and come up with simple conclusions  obtain data required from all kinds of engineering information including accident investigation report, risk assessment report, operational hazards analysis report, etc.
7.	Assessment	The integrated outcome requirement of this unit of competency is:
	Criteria	(i) Capable to obtain data required from engineering information to make analysis for the performance of occupational safety and health and environmental protection; use percentage and graphs to compile statistics, and come up with simple conclusions
8.	Remarks	The credit value of this unit of competency is set on the presumption that the person already possesses basic calculation knowledge.
