

1. Title	Running management of bulk material unloading and storage equipment									
2. Code	EMPEOM324A									
3. Range	Monitor the running management of bulk material unloading and storage equipment in general industrial plants, power plants or other places.									
4. Level	3									
5. Credits	3									
6. Competency	<p style="text-align: center;"><u>Performance Requirements</u></p> <table border="0"> <tr> <td style="vertical-align: top;">6.1</td> <td style="vertical-align: top;">Monitoring of bulk material unloading and storage equipment</td> <td style="vertical-align: top;"> <ul style="list-style-type: none"> ◆ Be familiar with technical management items for bulk material unloading and storage equipment including: <ul style="list-style-type: none"> • Safety and technical training • Formulation of running records, data logging equipment and shift system </td> </tr> <tr> <td style="vertical-align: top;">6.2</td> <td style="vertical-align: top;">Techniques for running management and daily operation of bulk material unloading and storage equipment</td> <td style="vertical-align: top;"> <ul style="list-style-type: none"> ◆ Monitoring procedures are carried out in suitable mode according to changes in different factors <ul style="list-style-type: none"> • Dust control monitor (water spraying system) is strictly performed according to running procedures so as to reduce the pollution to the environment </td> </tr> <tr> <td style="vertical-align: top;">6.3</td> <td style="vertical-align: top;">Professionalism in managing the running of bulk material unloading and storage equipment</td> <td style="vertical-align: top;"> <ul style="list-style-type: none"> ◆ Ensure that the running procedures are carried out according to safety guidelines </td> </tr> </table>	6.1	Monitoring of bulk material unloading and storage equipment	<ul style="list-style-type: none"> ◆ Be familiar with technical management items for bulk material unloading and storage equipment including: <ul style="list-style-type: none"> • Safety and technical training • Formulation of running records, data logging equipment and shift system 	6.2	Techniques for running management and daily operation of bulk material unloading and storage equipment	<ul style="list-style-type: none"> ◆ Monitoring procedures are carried out in suitable mode according to changes in different factors <ul style="list-style-type: none"> • Dust control monitor (water spraying system) is strictly performed according to running procedures so as to reduce the pollution to the environment 	6.3	Professionalism in managing the running of bulk material unloading and storage equipment	<ul style="list-style-type: none"> ◆ Ensure that the running procedures are carried out according to safety guidelines
6.1	Monitoring of bulk material unloading and storage equipment	<ul style="list-style-type: none"> ◆ Be familiar with technical management items for bulk material unloading and storage equipment including: <ul style="list-style-type: none"> • Safety and technical training • Formulation of running records, data logging equipment and shift system 								
6.2	Techniques for running management and daily operation of bulk material unloading and storage equipment	<ul style="list-style-type: none"> ◆ Monitoring procedures are carried out in suitable mode according to changes in different factors <ul style="list-style-type: none"> • Dust control monitor (water spraying system) is strictly performed according to running procedures so as to reduce the pollution to the environment 								
6.3	Professionalism in managing the running of bulk material unloading and storage equipment	<ul style="list-style-type: none"> ◆ Ensure that the running procedures are carried out according to safety guidelines 								
7. Assessment Criteria	<p>The integrated outcome requirement of this unit of competency is:</p> <p>(i) Capable to manage the running and daily operation of bulk material unloading and storage equipment.</p>									
8. Remarks	The credit value of this unit of competency is set on the presumption that the person already possesses basic knowledge of bulk material conveying and storage equipment.
