1. Title	Apply computer-aided design (CAD) software in plumbing design
2. Code	EMPDDE304A
3. Range	Apply various kinds of application software to support plumbing design.
4. Level	3
5. Credits	3

6. Competency	<u>Performance Requirements</u>
	
	6.1 Apply various kinds of computer application software to support plumbing design
	    ♦ Understand various kinds of computer application software to support plumbing design
	
	6.2 Use computer application software for plumbing
	    ♦ Apply advanced and professional computer application software to support plumbing design, such as:
	      • Hevacomp
	      • CADLink
	    ♦ Input correct data to obtain reasonable results

7. Assessment Criteria	The integrated outcome requirement of this unit of competency is: (i) Capable to apply various kinds of computer application software to support plumbing design.
8. Remarks	The credit value of this unit of competency is set on the presumption that the person already possesses basic plumbing knowledge and is a practitioner of plumbing.
