Specification of Competency Standards for the Fashion Industry Unit of Competency

Functional Area - Design

design projects. Level 5 Credit 4 Competency Performance Requirements 1. Knowledge in the subject area Be able to: identify the purpose, objectives and scope of a design project familiarise with the planning of a design project understand the constraints and limitations involved in the execution of a design project understand roles and responsibilities of all parties involved in the design project Application and process Be able to: define the purpose and objectives of a design project define the resources and estimate budgets to execute a design project ilaise with related parties to confirm their capacities and contribution in a design project determine the activities for executing a design project determine the activities to set a timeline for executing a design project develop plan for task allocation determine contingency plan for handling activities that are behind schedule consult related parties to confirm design project plan Exhibit professionalism Be able to: engage key parties and project members in the planning process so as to get their commitment 	Title	Plan design project
design projects. Level 5 Credit 4 Competency Performance Requirements 1. Knowledge in the subject area Be able to: identify the purpose, objectives and scope of a design project familiarise with the planning of a design project understand the constraints and limitations involved in the execution of a design project understand roles and responsibilities of all parties involved in the design project Application and process Be able to: define the purpose and objectives of a design project define the purpose and objectives of a design project define the resources and estimate budgets to execute a design project liaise with related parties to confirm their capacities and contribution in a design project determine the activities for executing a design project determine the activities to set a timeline for executing a design project develop plan for task allocation determine contingency plan for handling activities that are behind schedule consult related parties to confirm design project plan Sexhibit professionalism Be able to: engage key parties and project members in the planning process so as to get their commitment Development of a design project plan, which provides guidelines for allocating resourt and planning schedule, for achieving the project objectives.	Code	108069L5
Credit 4 Competency Performance Requirements Knowledge in the subject area	Description	Plan project for fashion design. This applies to individuals who are required to plan the fashion design projects.
Competency Performance Requirements 1. Knowledge in the subject area Be able to: identify the purpose, objectives and scope of a design project familiarise with the planning of a design project familiarise with the constraints and limitations involved in the execution of a design project understand the constraints and limitations involved in the execution of a design project understand roles and responsibilities of all parties involved in the design project 2. Application and process Be able to: determine the resources and estimate budgets to execute a design project determine the resources and estimate budgets to execute a design project determine the resources and estimate budgets to execute a design project determine the resources and estimate budgets to execute a design project determine the activities for executing a design project (e.g. submission of design concept, confirmation of colours, arrangement of sample review) schedule the activities to set a timeline for executing a design project develop plan for task allocation determine contingency plan for handling activities that are behind schedule consult related parties to confirm design project plan 3. Exhibit professionalism Be able to: engage key parties and project members in the planning process so as to get their commitment Assessment The integrated outcome requirements of this UoC are the abilities to accomplish: Development of a design project plan, whi	Level	5
1. Knowledge in the subject area Be able to: identify the purpose, objectives and scope of a design project familiarise with the planning of a design project understand the constraints and limitations involved in the execution of a design project understand trops and responsibilities of all parties involved in the design project understand roles and responsibilities of all parties involved in the design project 2. Application and process Be able to: define the purpose and objectives of a design project determine the resources and estimate budgets to execute a design project liaise with related parties to confirm their capacities and contribution in a design proje determine the activities for executing a design project (e.g. submission of design concept, confirmation of colours, arrangement of sample review) schedule the activities to set a timeline for executing a design project develop plan for task allocation determine contingency plan for handling activities that are behind schedule consult related parties to confirm design project plan 3. Exhibit professionalism Be able to: engage key parties and project members in the planning process so as to get their commitment Criteria The integrated outcome requirements of this UoC are the abilities to accomplish: Criteria	Credit	4
 identify the purpose, objectives and scope of a design project familiarise with the planning of a design project understand the constraints and limitations involved in the execution of a design project understand roles and responsibilities of all parties involved in the design project Application and process Be able to: define the purpose and objectives of a design project define the purpose and objectives of a design project define the resources and estimate budgets to execute a design project determine the resources and estimate budgets to execute a design project determine the activities for executing a design project (e.g. submission of design concept, confirmation of colours, arrangement of sample review) schedule the activities to set a timeline for executing a design project develop plan for task allocation determine contingency plan for handling activities that are behind schedule consult related parties to confirm design project plan Sthibit professionalism Be able to: engage key parties and project members in the planning process so as to get their commitment Assessment Criteria The integrated outcome requirements of this UoC are the abilities to accomplish: Development of a design project plan, which provides guidelines for allocating resource and planning schedule, for achieving the project objectives. 	Competency	
Be able to:• define the purpose and objectives of a design project• define the purpose and objectives of a design project• determine the resources and estimate budgets to execute a design project• liaise with related parties to confirm their capacities and contribution in a design proje• determine the activities for executing a design project (e.g. submission of design concept, confirmation of colours, arrangement of sample review)• schedule the activities to set a timeline for executing a design project• develop plan for task allocation• determine contingency plan for handling activities that are behind schedule• consult related parties to confirm design project plan3. Exhibit professionalism Be able to: • engage key parties and project members in the planning process so as to get their commitmentAssessment CriteriaThe integrated outcome requirements of this UoC are the abilities to accomplish: • Development of a design project plan, which provides guidelines for allocating resource and planning schedule, for achieving the project objectives.		 identify the purpose, objectives and scope of a design project familiarise with the planning of a design project understand the constraints and limitations involved in the execution of a design project
Be able to: engage key parties and project members in the planning process so as to get their commitment Assessment Criteria The integrated outcome requirements of this UoC are the abilities to accomplish: • Development of a design project plan, which provides guidelines for allocating resource and planning schedule, for achieving the project objectives.		 Be able to: define the purpose and objectives of a design project determine the resources and estimate budgets to execute a design project liaise with related parties to confirm their capacities and contribution in a design project determine the activities for executing a design project (e.g. submission of design concept, confirmation of colours, arrangement of sample review) schedule the activities to set a timeline for executing a design project develop plan for task allocation determine contingency plan for handling activities that are behind schedule
Assessment Criteria The integrated outcome requirements of this UoC are the abilities to accomplish: • Development of a design project plan, which provides guidelines for allocating resource and planning schedule, for achieving the project objectives.		Be able to:engage key parties and project members in the planning process so as to get their
Pomark		 The integrated outcome requirements of this UoC are the abilities to accomplish: Development of a design project plan, which provides guidelines for allocating resource
