Specification of Competency Standards for the Fashion Industry Unit of Competency

Functional Area - Quality System & Sustainability

Code 108237L6 Description Facilitate breakthrough improvements in a fashion business. This applies to individuals who are required to work in team to introduce, review and institutionalise radical changes to deliver a significant level of improvement in the operation of a fashion business. Level 6 Credit 4 Competency Performance Requirements 1. Knowledge in the subject area Be able to: understand the basic tenets of business reengineering critically evaluate the key factors for radical change management eliminate waste and improve value-addition for customers gain support in process redesigns and forestall potential resistance 2. Application and process Be able to: build teams for change initiatives establish vision and goals for intensive change initiatives (e.g. significant reduction of downtime) analyse processes establish vision and goals for intensive change initiatives (e.g. significant reduction of downtime) analyse processes flowchart and brainstorm to identify ways to redesign current business processes specify key performance indicators (KPIs) for new process designs devise communication strategy for team members and other stakeholders monitor changes and overcome unforeseen barriers establish mechanisms (e.g. reward system, training) to sustain the new processes stablish professionalism Be able to: establish a sense of urgency think outside the box		
Description Facilitate breakthrough improvements in a fashion business. This applies to individuals who are required to work in team to introduce, review and institutionalise radical changes to deliver a significant level of improvement in the operation of a fashion business. Level 6 Credit 4 Competency Performance Requirements 1. Knowledge in the subject area Be able to: • understand the basic tenets of business reengineering • critically evaluate the key factors for radical change management • eliminate waste and improve value-addition for customers • gain support in process redesigns and forestall potential resistance 2. Application and process Be able to: • build teams for change initiatives • establish vision and goals for intensive change initiatives (e.g. significant reduction of downtime) • analyse processes a analyse process flowchart and brainstorm to identify ways to redesign current business processes • specify key performance indicators (KPIs) for new process designs • deviae communication strategy for team members and other stakeholders • monitor changes and overcome unforeseen barriers • evaluate outcomes of change initiatives (e.g. intended versus unintended consequences) • establish mechanisms (e.g. reward system, training) to sustain the new processes 3. Exhibit professionalism Be able to: • establish mechanisms (e.g. reward system, training) to sustain the new processes 3. Exhibit professionalism Be able to: • establish a sense of urgency • think outside the box and apply both creative and analytic thinking skills Assessment Criteria The integrated outcome requirements of this UoC are the abilities to ac	Title	Facilitate breakthrough improvements
required to work in team to introduce, review and institutionalise radical changes to deliver a significant level of improvement in the operation of a fashion business. Level 6 Credit 4 Competency Performance Requirements Knowledge in the subject area Be able to: understand the basic tenets of business reengineering	Code	108237L6
Credit 4 Competency Performance Requirements 1. Knowledge in the subject area Be able to: understand the basic tenets of business reengineering critically evaluate the key factors for radical change management eliminate waste and improve value-addition for customers gain support in process redesigns and forestall potential resistance 2. Application and process Be able to: build teams for change initiatives establish vision and goals for intensive change initiatives (e.g. significant reduction of downtime) analyse process flowchart and brainstorm to identify ways to redesign current business processes specify key performance indicators (KPIs) for new process designs devise communication strategy for team members and other stakeholders monitor changes and overcome unforeseen barriers evaluate outcomes of change initiatives (e.g. intended versus unintended consequences) establish mechanisms (e.g. reward system, training) to sustain the new processes 3. Exhibit professionalism	Description	
Competency Performance Requirements 1. Knowledge in the subject area Be able to: • understand the basic tenets of business reengineering • critically evaluate the key factors for radical change management • eliminate waste and improve value-addition for customers • gain support in process redesigns and forestall potential resistance 2. Application and process Be able to: • build teams for change initiatives • establish vision and goals for intensive change initiatives (e.g. significant reduction of downtime) • analyse process flowchart and brainstorm to identify ways to redesign current business processes • specify key performance indicators (KPIs) for new process designs • devise communication strategy for team members and other stakeholders • monitor changes and overcome unforeseen barriers • evaluate outcomes of change initiatives (e.g. intended versus unintended consequences) • establish mechanisms (e.g. reward system, training) to sustain the new processes 3. Exhibit professionalism Be able to: • establish a sense of urgency • think outside the box and apply both creative and analytic thinking skills Assessment	Level	6
1. Knowledge in the subject area Be able to: understand the basic tenets of business reengineering critically evaluate the key factors for radical change management eliminate waste and improve value-addition for customers gain support in process redesigns and forestall potential resistance 2. Application and process Be able to: build teams for change initiatives e establish vision and goals for intensive change initiatives (e.g. significant reduction of downtime) analyse process flowchart and brainstorm to identify ways to redesign current business processes specify key performance indicators (KPIs) for new process designs devise communication strategy for team members and other stakeholders monitor changes and overcome unforeseen barriers evaluate outcomes of change initiatives (e.g. intended versus unintended consequences) establish mechanisms (e.g. reward system, training) to sustain the new processes 3. Exhibit professionalism Be able to: establish a sense of urgency think outside the box and apply both creative and analytic thinking skills Assessment Criteria The integrated outcome requirements of this UoC are the abilities to accomplish: Facilitation of breakthrough improvements with team members in a fashion business tha involve both creative and analytic thi	Credit	4
	Competency	 Knowledge in the subject area Be able to: understand the basic tenets of business reengineering critically evaluate the key factors for radical change management eliminate waste and improve value-addition for customers gain support in process redesigns and forestall potential resistance Application and process Be able to: build teams for change initiatives establish vision and goals for intensive change initiatives (e.g. significant reduction of downtime) analyse process flowchart and brainstorm to identify ways to redesign current business processes specify key performance indicators (KPIs) for new process designs devise communication strategy for team members and other stakeholders monitor changes and overcome unforeseen barriers evaluate outcomes of change initiatives (e.g. intended versus unintended consequences) establish mechanisms (e.g. reward system, training) to sustain the new processes Exhibit professionalism Be able to: establish a sense of urgency think outside the box and apply both creative and analytic thinking skills The integrated outcome requirements of this UoC are the abilities to accomplish: Facilitation of breakthrough improvements with team members in a fashion business that involve both creative and analytic thinking for process redesign as well as systematic planning, implementation, review and institutionalisation of breakthrough improvement
