<b>IV</b>	<b>Job Profiles for Selected Job Roles with UoC Mapping</b>	<b>8-43</b>

## I. Overview on Progression Pathway

The example of Progression Pathway of Corporate and Commercial Banking is assembled based on the Specification Competency Standards (SCS) of Corporate and Commercial Banking sector revised in 2019.

SCS is a comprehensive set of competency standards specifying the performance requirements and outcome standards of distinct job tasks of different functions at various levels of the banking industry while a Unit of Competency (UoC) is the smallest unit that signifies a discrete task to be performed within a job function. Based on this background, the progression pathway exhibited in this document attempts to utilize this information to provide practical examples to the Corporate and Commercial Banking sector in the context of career and learning development.

This document involves the drawing up of a structural diagram showing the overarching Progression Pathway for selected job roles in the Corporate and Commercial Banking sector. The initiatives include:

- a. Drawing a common organization chart of Corporate and Commercial Banking which specifies the key functions of the Corporate and Commercial Banking sector;
- b. Suggesting the Progression Pathways for the ten selected job roles;
- c. Selecting ten major job roles in the sector and identifying their job responsibilities; and
- d. Mapping the UoCs with the competency requirements of the ten selected job roles

It is expected that the examples of Progression Pathway provided here can help practitioners of the sector or those who are interested in developing a career in the banking sector leverage on the SCS for their vocation and learning progression in the future.

The ten job roles selected for this purpose are:

### **A. Client Relationship Stream in Small and Medium sized Enterprises (SME)**

1. Assistant Relationship Manager (ARM)
2. Relationship Manager (RM)
3. Team Head of Relationship Manager / Senior Relationship Manager (SRM)
4. Business Director of Relationship Management

### **B. Corporate and Commercial Banking Middle Office Stream**

1. Assistant Manager / Officer, Onboarding
2. Manager, Onboarding

### **C. Product Development Stream**

1. Assistant Manager / Officer, Product Development
2. Manager, Product Development

### **D. Credit Risk Management Stream**

1. Assistant Manager / Officer, Credit Risk Management
2. Manager, Credit Risk Management

These ten job roles have been selected as they are the common jobs in the sector and particularly important in terms of business acquisition, compliance management, risk management and credit management. These examples also represent various possible movement and advancement opportunities available for different categories of jobs.

**In Section II**, an example of common Corporate and Commercial Banking Organization Chart is exhibited for reference. The organization chart is an example to show different banking functions distributed amongst the sector's front line, middle office and back office. It covers the major business, operations and support areas including business acquisition, onboarding, sales and marketing, product development, compliance management, credit management, internal control, technology management and other support functions, etc. which represents a common Corporate and Commercial Banking structure of the banks in Hong Kong.

The 10 key job roles mentioned above are identified from this organization chart and used as examples to illustrate how the Unit of Competency (UoC) can be employed to plan and develop a progression pathway in the banking sector.

**In Section III**, the example of the Progression Pathway in Corporate and Commercial Banking demonstrates the application of UoC on career and learning pathway. It shows the prospects of both vertical upward progression within the work stream one starts his / her career in the banking sector and cross work stream advancement. It also displays the opportunities of horizontal movement switching from one job stream to another. The possibilities of this movements are depending on the linkage of UoC mapping between different job roles. And the UoC mapping of individual jobs are presented in section IV of this document.

For example, a fresh university graduate may start his / her career in the banking sector as an ARM (SME); Assistant Manager / Officer, Onboarding; Assistant Manager / Officer, Product Development or Assistant Manager / Officer, Credit Risk Management based on their academic background and personal interests. They can learn on the job and / or through other means of structural training to acquire the skills and knowledge as specified on the UoC mapping list stated in section IV. One can also switch from a job stream to another horizontally [e.g. ARM (SME) to ARM (Mid Cap) or to Assistant Manager / Officer, Product development] at these entry level of jobs when opportunities arise.

As sufficient experience is gained, the skills and knowledge acquired from the entry level job will become a foundation of competences built which facilitate the job holder to move up the career ladder within the job stream. On the other hand, this foundation may also affect his / her future progression pathways towards other job families since the jobs at the next higher level of other job streams usually require an underpinning of significant relevant competence to get into the position.

For example, with the competence gained from the role as an ARM (SME), one can move up to a RM role (SME) or enhance his / her own capacity by fulfilling the UoC requirements specified for various job roles of other work streams at next higher level based on his / her career aspiration (e.g. Manager, Onboarding). However, it is unlikely for an Assistant Manager / Officer, Onboarding to move up across boundaries to become a Relationship Manager or a Manager, Credit Risk Management as the UoC requirements of these more senior job roles at other job families is relatively different from the Onboarding work stream unless a robust development plan is created against the required competences.

The rationale behind these examples is that the competence and experience gained in one position have to be matched with (or established the groundwork to further attain) the requirements of the job roles at next higher level for anyone who wants to move up along his / her desired career pathways. As shown in the list of UoC mapping of the 10 selected job roles, the UoC requirements for an ARM position coincide with a substantial amount of UoCs required of Assistant Manager / Officer, Onboarding; Assistant Manager / Officer, Product development and Assistant Manager / Officer, Credit Risk Management. This competency groundwork allows an ARM to acquire the relative UoCs of other job streams at more advance level across boundaries.

This single example is chosen to illustrate how UoCs can be designated on different job roles and why UoC components of a job role can affect one's progression pathway. By comparing similarities and variations of UoC requirements between different job roles, more possibilities of career and learning pathways can be explored within Corporate and Commercial Banking sector.

**In Section IV, Job Profiles of selected roles with UoC Mapping** specifies the key responsibilities of the 10 selected job roles. Again, the examples of job profile shown here do not represent an industry standard; they can be considered as common tools to reflect the accountabilities and functional purposes of different job roles. As individual banks may have different business / operations needs which affects the design of their job roles accordingly, their actual job profile components may have differences deviated from these examples.

This section exhibits the job profiles of the 10 job roles in 4 different job streams, namely,

1. Client Relationship Management (SME) stream;
2. Middle Office stream;
3. Product Development stream; and
4. Credit Risk Management stream.

In the first stream, it covers 4 levels of different seniority and shows the profiles from an entry level job to the highest managerial level components of responsibilities. For the remaining work streams, only the Assistant Manager / Officer to its next higher-level job, i.e. the Manager position's responsibilities components are shown.

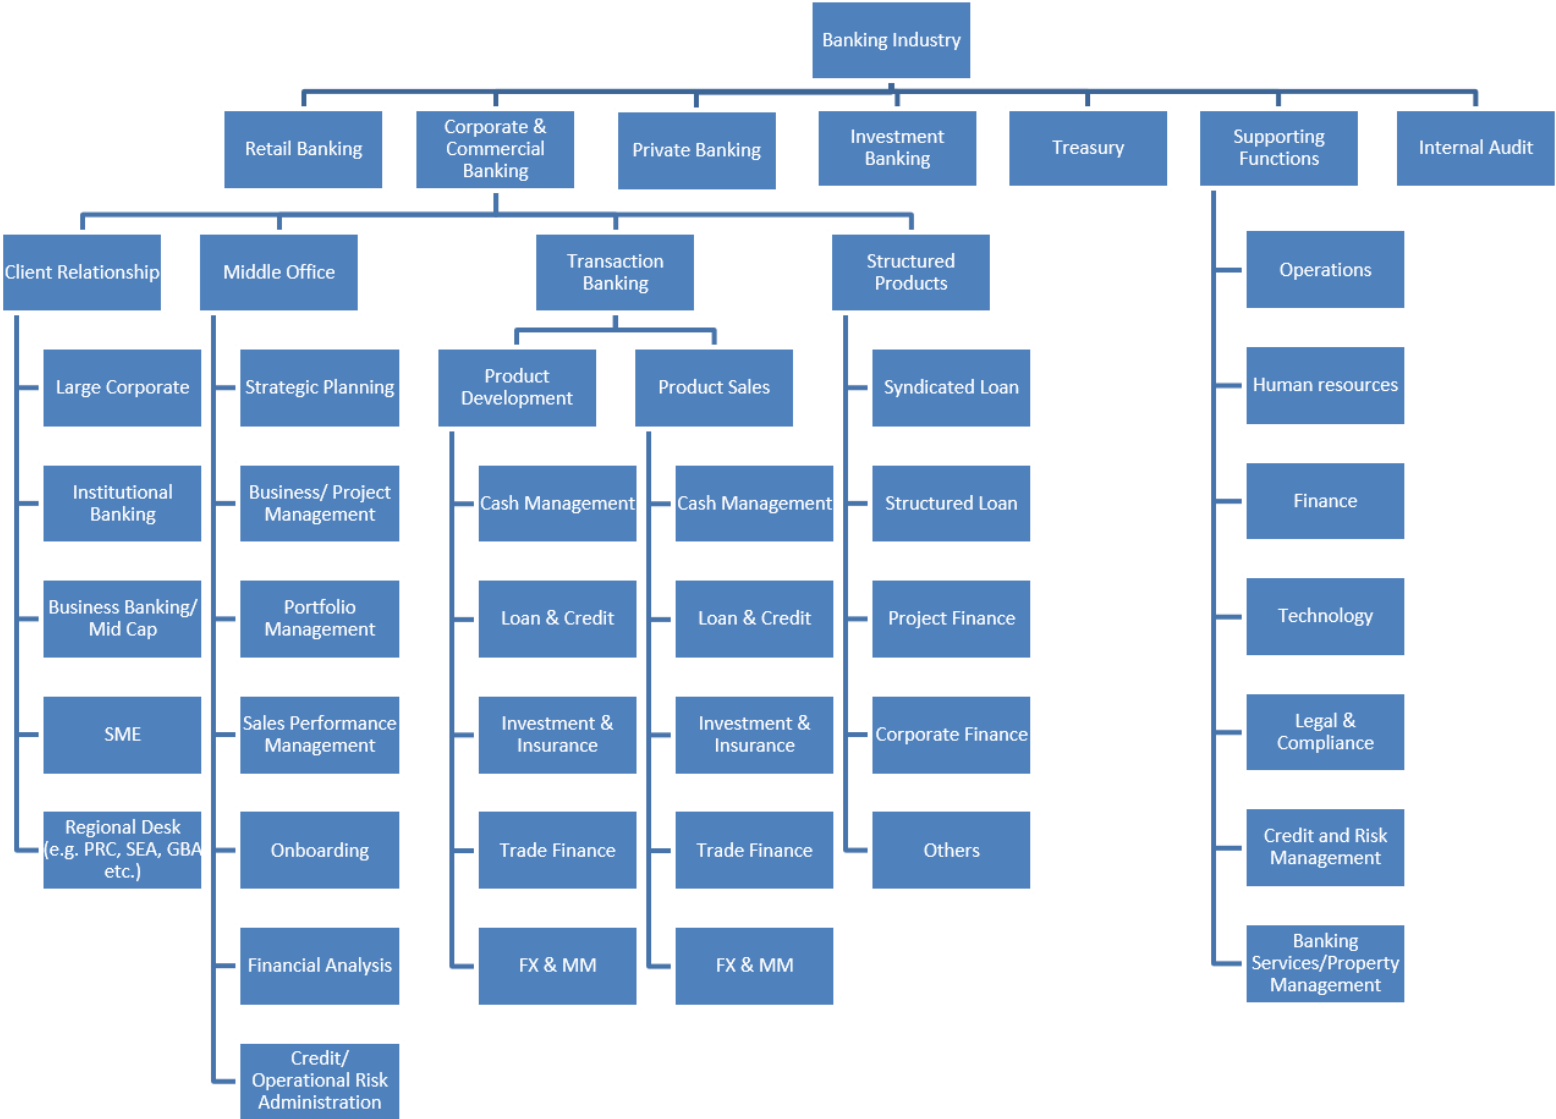

Regarding the competency requirements of these 10 different job roles, relevant UoCs can be identified from the Corporate and Commercial Banking SCS and mapped into individual job role. Referring to the UoC mapping examples, it is obvious that more functional or technical UoCs are required at the junior positions while more strategic decision and managerial UoCs are needed at more senior positions. With this assumption, readers may find variety of major differences in the UoC requirements between the junior job roles of different job streams; whereas, the UoC requirements setting at more senior positions of the different job streams with similar UoCs identified related to strategic decision or managerial functions.

Readers may also recognize the major differences between the junior job roles and managerial job roles based on their job profiles. The key functions of the relatively more senior job roles are making strategic decisions and demonstrating leadership to carry out their functional responsibilities. With this background, although the UoCs assigned to the junior job roles are also part of the requirements of the managers within the same job stream, the job holders at the more senior positions may only use this knowledge to manage his / her subordinates' performance and seldom apply them directly on their own jobs independently.

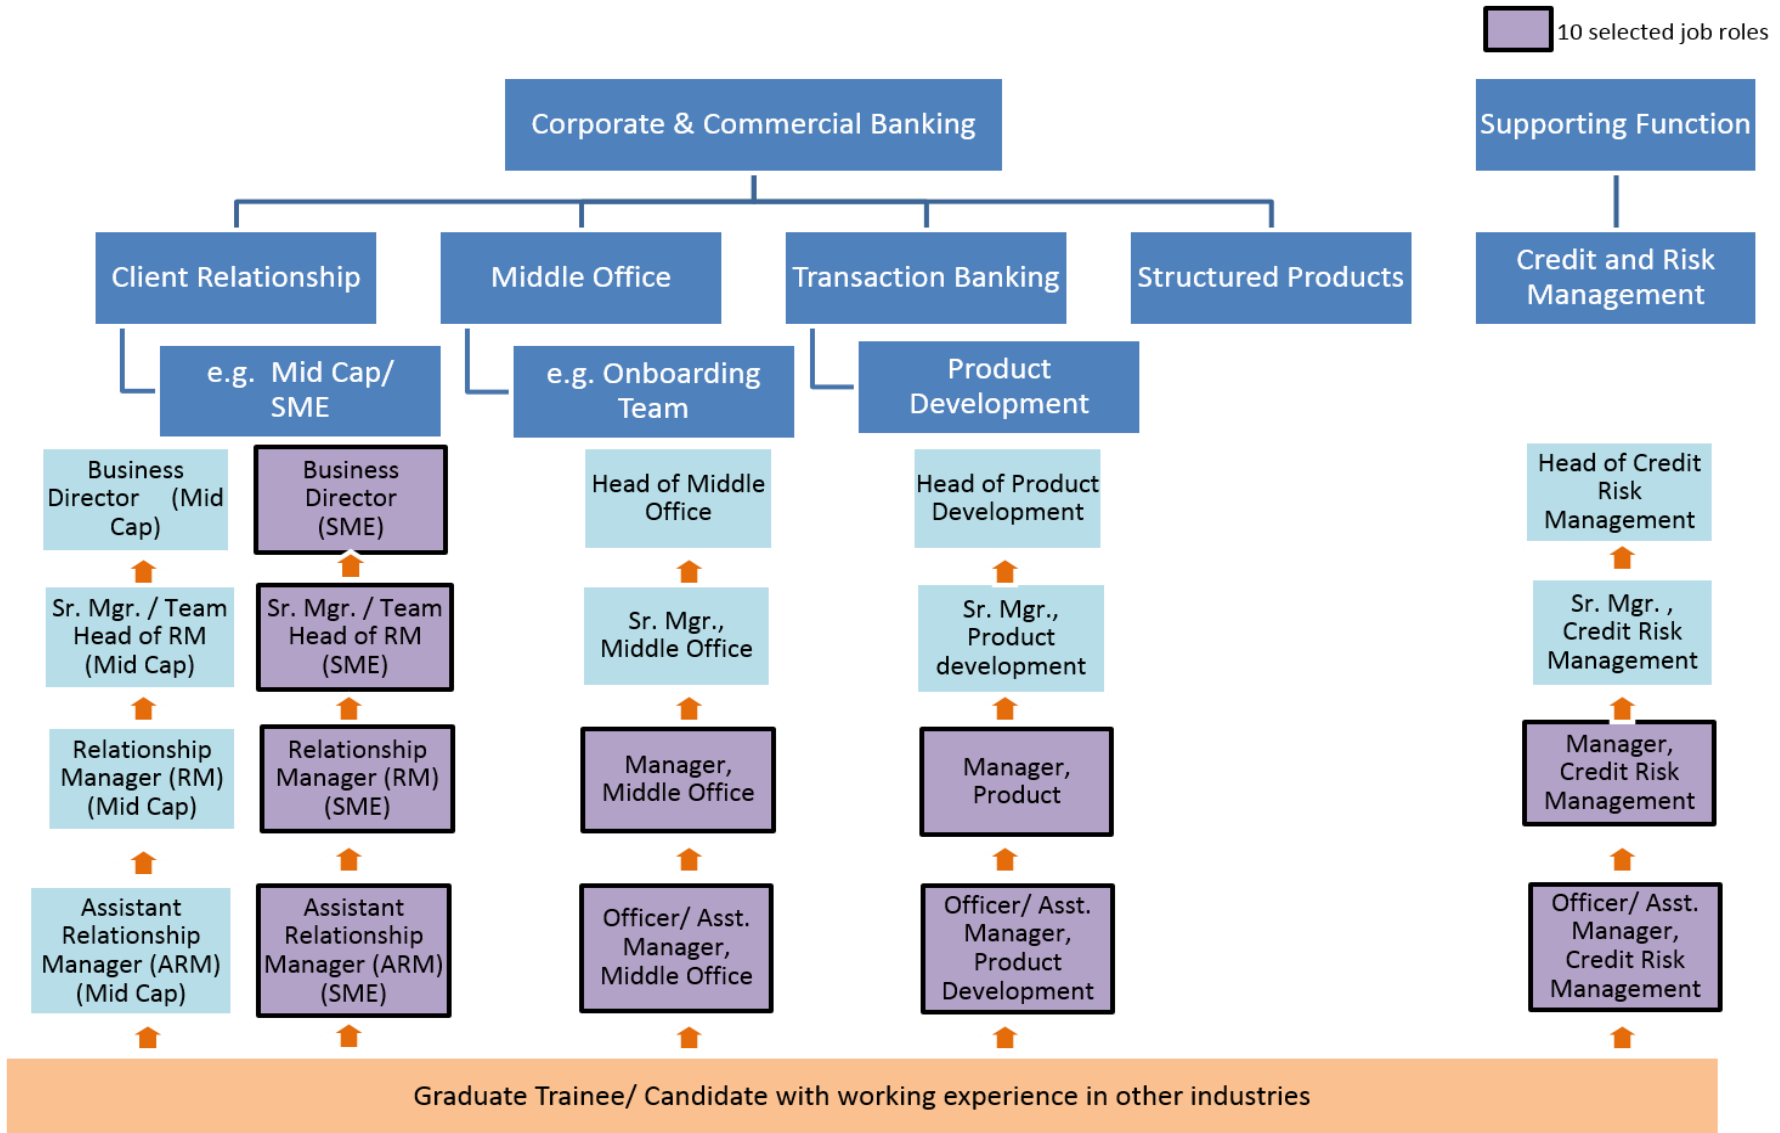

As illustrated in these examples, these UoC mappings reveal the possibilities of drawing a road map of learning and career pathways. Therefore, for those who are interested to develop a career in the Corporate and Commercial Banking sector, this is a useful tool for them to start their vocation planning.

**Note:** *The responsibilities and UoCs assigned for these ten job roles in this example are **for reference only**. Different banks may have their own considerations to design their job components and result in different competency requirements.*

## II. Common of Corporate and Commercial Banking Organization Chart

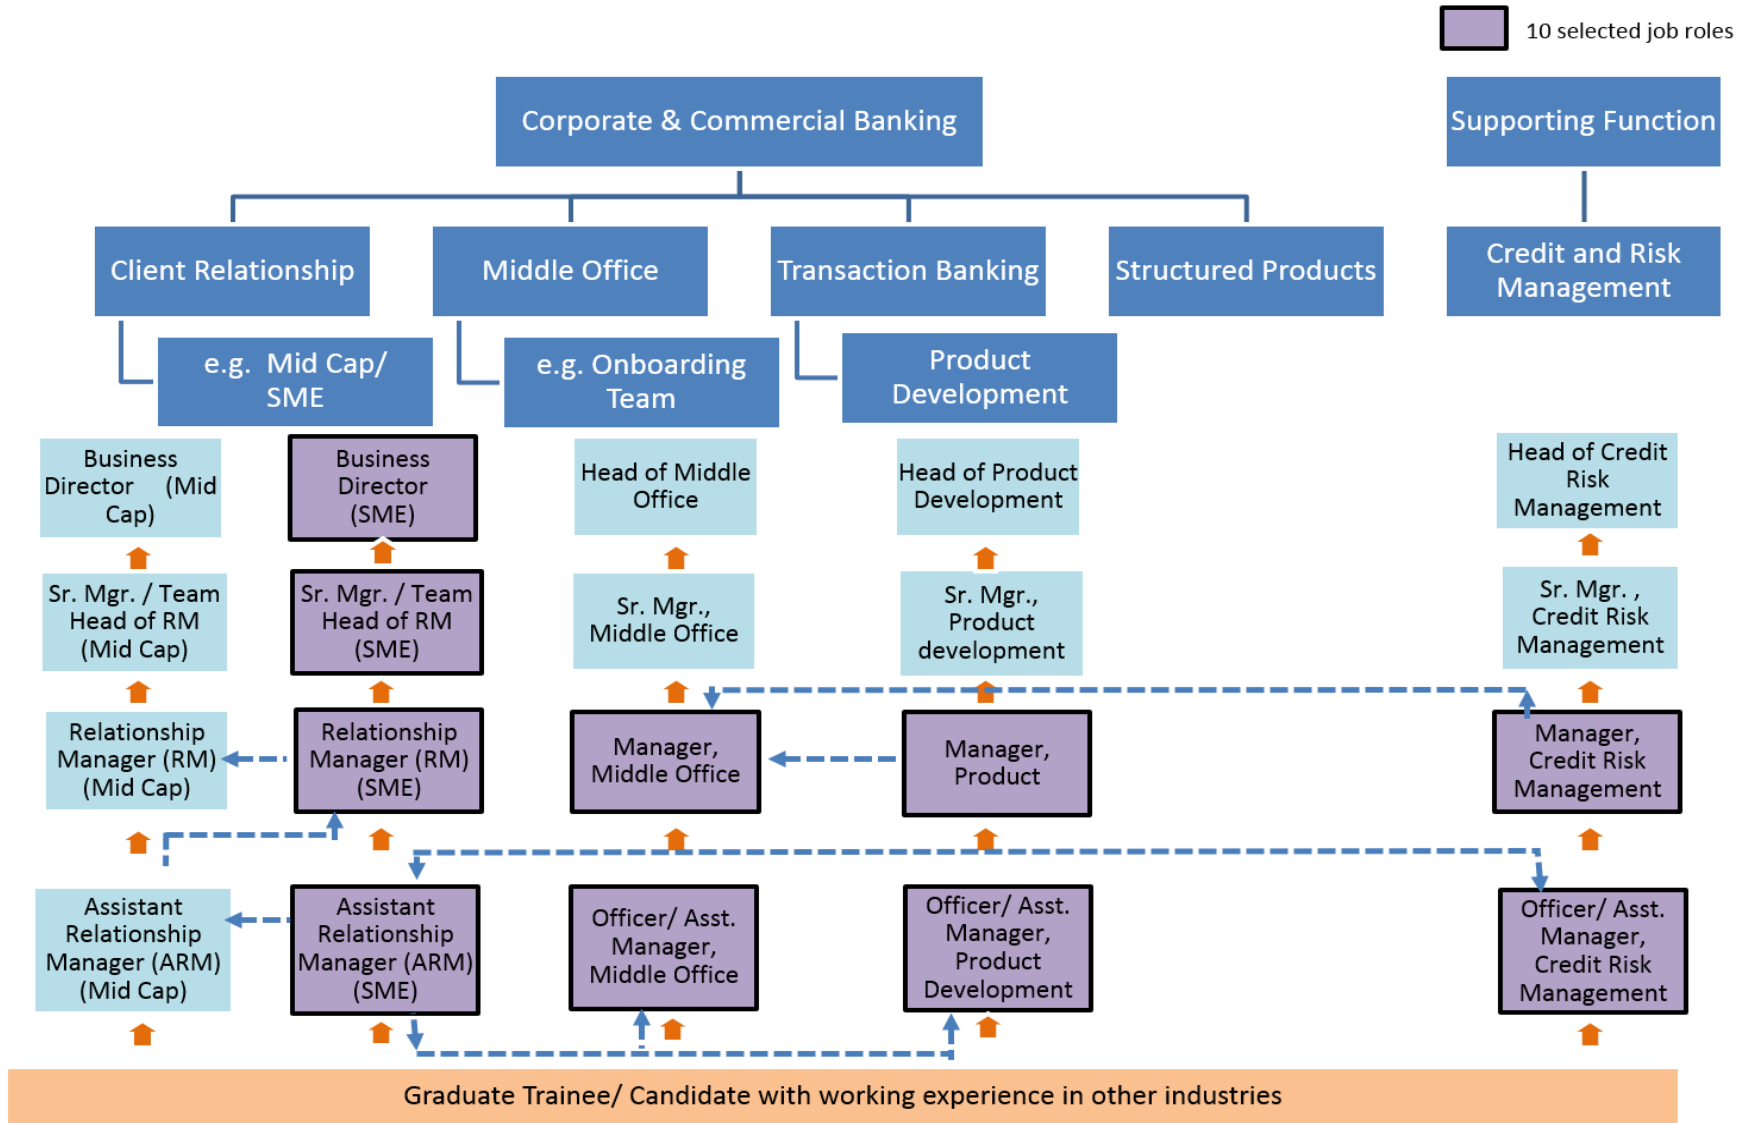

### IIIa. Progression Pathway for 10 Selected Job Roles (under same work stream)

### IIIb. Progression Pathway for 10 Selected Job Roles (under same or other possible work stream)

## IV. Job Profiles for Selected Job Roles with UoC Mapping

### A. Client Relationship Stream in SME

#### 1. Assistant Relationship Manager (ARM) of SME

This position is under general supervision of the Relationship Manager who provides diversified support to the initiation, growth and management of Commercial Banking accounts. It is responsible for acquiring, developing and maintaining client relationships of business accounts though providing quality and professional service directed to their financial, investment and insurance needs.
