

# Specification of Competency Standards for ICT Operation and Support

## Unit of Competency

### Functional Area: Messaging Support

Title	Detect and protect against email spam
Code	107877L2
Range	This unit of competency applies to IT support personnel who are responsible to support users with email issues. This UoC concerns support of email spam which is one of the biggest causes of email security risks. Support personnel will assist users when they encounter problems caused by spam emails, such as clearing problems like virus and spyware from the client machines, setting the email client to detect, filter and block spam email. Additionally and more importantly they need to provide friendly advice on how to spot malicious email.
Level	2
