Information and Communications Technology Industry Training Advisory Committee Software Products and Software Services (SW) branch Unit of Competencies

requirements 2. Code ITSWAR511A 3. Range Perform gap analysis of the current relevant business requirements functions) that are needed to be or to be removed from the current functions) that are needed to be or to be removed from the current functions) that are needed to be or to be removed from the current functions) that are needed to be or to be removed from the current functions) that are needed to be or to be removed from the current functions) that are needed to be or to be removed from the current baseline busines functions. 4. Level 5 5. Credit 3 6. Competency 6.1 Understand the basic building blocks of a network architecture and the needs of new busine requirements 6.2 Identify the gaps between the baseline network architecture and the needs of new busine requirements 6.3 Perform gap analysis of the current baseline against the target business architecture professionally 7. Assessment Criteria The integrated outcome requirement baseline against the current baseline against the target business architecture professionally	npetencies
2. Code ITSWAR511A 3. Range Perform gap analysis of the currer relevant business requirements functions) that are needed to be or to be removed from the currer [Architecture – Network Architect 4. Level 5 5. Credit 3 6. Competency 6.1 Understand the basic buildir blocks of a network architectur and the needs of new businer requirements 6.2 Identify the gaps between the baseline network architectur and the needs of new businer requirements 6.3 Perform gap analysis of the current baseline against the target business architecture professionally 7. Assessment Criteria The integrated outcome requirer analysis of the current baseline against the target business architecture professionally 7. Assessment Criteria The integrated outcome requirer analysis of the current baseline against the target business architecture professionally	rrent network architecture against the business
 Range Perform gap analysis of the curr relevant business requirements functions) that are needed to be or to be removed from the currer [Architecture – Network Architect Level 5 Credit 3 Competency 6.1 Understand the basic buildir blocks of a network architectur and the needs of new busing requirements Identify the gaps between the baseline network architectur and the needs of new busing requirements Perform gap analysis of the current baseline against the target business architecture professionally Assessment Criteria The integrated outcome requirement baseline analysis of the current baseline as in allysis of the current baseline as analysis of the current baseline analysis of the current baseline as analysis of the current baseline analysis of the current baseline as analysis of the current baseline at the integrated outcome requirer analysis of the current baseline at the integrated outcome requirer analysis of the current baseline as analysis of the current baseline as analysis of the current baseline at the integrated outcome requirer analysis of the curre	
 4. Level 5 5. Credit 3 6. Competency 6.1 Understand the basic buildir blocks of a network architect 6.2 Identify the gaps between the baseline network architectur and the needs of new busine requirements 6.3 Perform gap analysis of the current baseline against the target business architecture professionally 7. Assessment Criteria 7. Assessment Criteria 7. Assessment Criteria 7. Assessment Criteria 6.3 The integrated outcome requirer analysis of the current baseline is to identify those building blocks network architecture and / or to baseline is to identify those building blocks network architecture and / or to baseline is to identify the set and a stakeholder's needs. 	
5. Credit 3 6. Competency 6.1 Understand the basic buildir blocks of a network architect 6.2 Identify the gaps between the baseline network architectur and the needs of new busine requirements 6.3 Perform gap analysis of the current baseline against the target business architecture professionally 7. Assessment Criteria The integrated outcome requirer analysis of the current baseline is to identify those building blocks network architecture and / or to baseline is to identify those building blocks network architecture and / or to baseline is to identify the baseline is to identify the baseline is to baseline it it is to baseline it is tobaseline it is tobas	
 6. Competency 6.1 Understand the basic buildir blocks of a network architect 6.2 Identify the gaps between the baseline network architectur and the needs of new busine requirements 6.3 Perform gap analysis of the current baseline against the target business architecture professionally 7. Assessment Criteria 7. Assessment Criteria 7. Assessment The integrated outcome requirer analysis of the current baseline a to identify those building blocks network architecture and / or to b stakeholder's needs. 	
 baseline network architectur and the needs of new busine requirements 6.3 Perform gap analysis of the current baseline against the target business architecture professionally 7. Assessment Criteria The integrated outcome requirer analysis of the current baseline a to identify those building blocks network architecture and / or to b stakeholder's needs. 	Performance Requirements ing Be able to identify the building blocks of a cture network architecture and its basic components
 current baseline against the target business architecture professionally Assessment Criteria The integrated outcome requirer analysis of the current baseline to identify those building blocks network architecture and / or to stakeholder's needs. 	ure identify the gaps between the baseline
Criteria analysis of the current baseline a to identify those building blocks network architecture and / or to stakeholder's needs.	 perform gap analysis of the current
Remark Pre-requisite: ITSWAR509A	ements of this UoCs is the ability to perform gap against the relevant business requirements so as that are needed to be developed in the target be removed from the current baseline, subject to
